ABOUT ME

Currently pursuing a degree in Computer Engineering with aspirations to become a proficient Software developer and Cybersecurity expert. Committed to continuous learning and gaining hands-on experience through real-world projects.

ACHIEVEMENTS

Smart India Hackaton 2025 Finalist

EXPERIENCE

Internship at **Virtue Crennovative Solutions** for Graphic Designer Post

EDUCATION

Fr. Conceicao Rodrigues College of Engineering 2024 - Present
CGPA: 9.17

BTech in Computer Engineering

Enrolled in Multidisciplinary Minor degrees:

- 1.Design Engineering
- 2.Automation and Robotics

PROJECTS

1. AquaVision: Smart Fish ID & Traceability

AquaVision is an advanced mobile application designed for modern fisherfolk, providing on-the-spot analysis of their catch. Built with an offline-first philosophy, it uses on-device Artificial Intelligence to identify fish species, estimate quantity and weight, and assess freshness, all without requiring an internet connection.

Project Link: <https://rahul9969.github.io/AquaVision/>

2. AI Trip Planner

AI Trip Planner is a smart web application that revolutionizes travel planning. It crafts bespoke, end-to-end itineraries in seconds. Its standout feature is a visual Mood Board, allowing users to define their trip's "vibe" through images, not just keywords.

Project Link: <https://rahul9969.github.io/AI-TRIP-PLANNER/>

3. TaxWise

TaxWise is an **AI-powered personal finance platform** specifically designed to simplify **tax filing** and **credit score management** for Indian users.
